

## MINES, MILLING AND MINING.

Beath of a Former Owner  
in the Famous Old  
Emma Mine.

## THE STOCK EXCHANGE.

The Good it Has Accom-  
plished and the Necessity  
of Keeping it Up.

## IN THE MERCUR MINE.

Great Bodies of Free Milling Ore  
Uncovered.

Chicago Gold Exhibit—Fatal Mercur Accident—Rich South Dakota Ore—In American Fork Canyon—Pollock's Weekly Letter—DeLamar, Nevada, Deal—Gold Brick From the Barcroft Mine—Gold Discoveries in Cedar Mountain, Iron County—Showing in the Annie—Output of the De Lamar Mine For June—Ore and Bullion—Bank Clearings—Silver and Lead Quotations—Mining Notes and Personals.

The recent death of Captain James M. Day at his home in Galena, Ill., will recall to the memory of many Salt Lake the early history of the mining camp of Alta, at the head of Little Cottonwood, in which the captain cut an active and prominent figure.

Alta, along with other Utah mining camps that were noted for their wealth of high-grade mineral, has had its ups and downs; it has seen times when it was the acme of life, activity and progress, and it has also experienced times of depression when hardly

JAMES SMITH.  
A soul was left in camp to tell the story of its former glory or to predict its future.

The mining camp of Alta was discovered early in the sixties by General Connor's soldiers, and for some time there was considerable activity in that locality; but nothing especially worthy of mention was accomplished, and for a while the camp was practically abandoned.

Later on, about the year 1867, the district sprang into prominence again, and the North Star was discovered and worked by H. L. Bruner of Philadelphia, who built a smelter at the mine, which proved a failure, and the mine, for some reason, probably because of inexperience, did not come up to expectations in production, and the old smelter and mine were abandoned.

In 1868 Colonel J. F. Woodman and R. B. Chisholm, who were then operating in Pahranagat valley, Lincoln county, Nevada, began prospecting in Little Cottonwood canyon, and during the same year Colonel Woodman discovered and located the famous Emma mine; and this great property was opened up by Colonel Woodman, R. B. Chisholm, Captain James A. Day and James Smith, and later on, in carry-

R. B. CHISHOLM.

ing on the development of the mine, these gentlemen were joined by the Walker Bros. of this city.

The first work in the development of the Emma, however, was carried on under the direction of Colonel Woodman, and W. W. Chisholm, who is now secretary and treasurer and a heavy stockholder in the great Centennial-Eureka mine at Eureka, Tintic.

The Emma was essentially a grassroots proposition, the character of the ore being galena and sand carbonates that averaged about \$100 net per ton after being shipped to Swansea, Wales, for treatment; while occasional chutes were encountered that carried values of \$2,000 in the precious metals to the ton. For a number of years the Emma ores were shipped to Henry Selby & Co. of San Francisco, but later on it was found to be more profitable to ship to Wales, and this was done until the

date of the sale of the mine to an English syndicate in 1871, at which time the earnings of the property had been about \$2,000,000.

The English company then put in an extensive plant and took out about two million more, when it encountered a fault or break in the vein, and since that day the property has been practically idle, being occasionally worked by chlorides in a spasmodic and ineffectual manner, and today this grand old camp is a relic of a glorious past, with every indication that it will at some day in the near future secure a new lease of life and once again astonish the world with the marvelous wealth of its mineral deposits, which are by no means exhausted as yet.

At the time of the discovery of the Emma mine, a little prospecting was going on in what is now Park City, and Tintic district was virtually unknown. At this time Louis Simmons, a son-in-law of Kit Carson, was at work on the Green Monster mine in the Park City region, and the miners employed at Alta received flattering

COL. J. F. WOODMAN.

reports from that locality, which has since developed one of the greatest silver camps in the world.

Soon after Colonel Woodman discovered the Emma, and it was opened by himself and Mr. Chisholm. The Flaggstaff, South Star and Tintic, Montezuma, Savage, City of Rocks, Davenport, Prince of Wales and Wellington mines, all noted producers in their day, were found and developed, and from 1880 to 1885 the head of Little Cottonwood canyon was one of the largest mining camps in the west, and in 1881 it was by all odds the most important and prolific camp in Utah.

Of the four men who assisted in making Alta what it was, and who are deserving of the credit of opening up and developing the richest camp that Utah has ever known, but one is alive today. This is Colonel Woodman, a respected and honored citizen of this city, who, although well along in years, is still actively engaged in mining enterprises. After leaving Alta he engaged in mining in Eureka, Tintic, and was largely identified in the opening and development of the Centennial-Eureka mine, which is classed as one of the richest mines in Utah today, and in which he still holds office and owns a large block of stock; besides which, he is prominent in Deep Creek mining and other enterprises calculated to benefit the state.

James Smith died in California along in the '80's, while R. B. Chisholm departed this life on June 20, 1881.

These pioneers were all strong, influential men, whose word was as good as their bond, and they will be long remembered for the active part they took in the development of the mineral development of this state. The portraits that we give herewith of these gentlemen were taken when they were in the prime of life, and when their efforts in the opening of the Emma mine had been crowned with success.

In speaking of the death of Captain Day, a Galena, Illinois, paper says:

James Day, one of the pioneers of Galena, died Friday morning at his beautiful suburban home at Millburg, at the age of 77 years, and thus ended

a remarkable and successful career. Mr. Day succumbed to a paralytic stroke, and the end was not unexpected. He had enjoyed excellent health up to last winter, when he was stricken by paralysis while visiting in California. He came home very much feeble in health, but rallied and regained much of his former vigor, but last week the second stroke came. At 2 o'clock Friday morning he passed away.

Mr. Day came to Galena in 1834, when a lad of 15. He was of Scotch-Irish lineage and a Virginian by birth. His father, Erasmus Day, was one of the first settlers of Vinegar Hill and was a farmer and justice of the peace there until his death. The son spent his earlier life here, engaging in various pursuits, and he saw the development of Galena from an embryo mining camp to, as it was the 50's, the chief commercial mart of the northwest. He followed mining principally, but was at one time engaged in business where the Merchant's National bank now stands. He married Miss Gray, also a member of one of the pioneer families of Galena, who survives to mourn his departure. They had no children.

When the commercial glory of Galena began to wane Mr. Day decided to try his fortunes in the new west, toward which a steady stream of immigration was then pouring. He went to the gold fields of California and lived in the west twenty years. Those were times of adventure of all kinds in the west and he experienced his share.

He became one of the owners of what was called the Emma mine, a rich silver lode, in Utah. The mine developed into a veritable bonanza, and dividends from Mr. Day's sixteenth interest made him a rich man. In a short time he cleared up about a quarter of a million dollars.

Having made his fortune he returned to Galena and bought a pretty home at Millburg, where he spent his last years. Although he made frequent visits to California, he also bought a section of land surrounding his home, which he owned until his death. He was a man of large heart and generous spirit, and his large fortune was reduced much, but he retained an abundance.

Mr. Day had a strong personality, in which were blended the courtesy and refinement of the old school gentleman with the sterner qualities of the pioneer. He had a distinguished appearance and his striking resem-

blance in features and form to General Robert E. Lee was often remarked. By all the older citizens of Galena he was known as pre-eminently an honest man, one without guile. Mr. W. F. Snyder, who knew him from his first year of residence here and they were close friends throughout life.

The funeral of Mr. Day was held Sunday afternoon from his residence at Millburg, and the vast concourse of attending friends, the largest which he held. Many from Galena and all surrounding townships were present, and the cortege that moved from the residence of Greenwood cemetery in this city was over a mile in length.

The funeral services were short and simple. Rev. David Clark of the First Presbyterian church officiated. The hymns were sung by Mr. and Mrs. J. S. Baume and Mrs. Charles Schreier. The selections were "Rock of Ages," "Jesus, Lover of My Soul," and "Shall We Gather at the River."

The honorary pall-bearers were Messrs. W. H. Snyder, Kendrick Newsum, William Bell, Eli Lewis, D. F. Loveland and J. B. Young. The active bearers were Messrs. George Graham, T. M. Roberts, J. J. Gray, A. R. Elder, Thomas Birckhead and William Bartle.

## POLLOCK'S LETTER.

Review of the Mining Share Market For the Week.

James A. Pollock will say in his weekly Mining Share Market Letter under date of July 3, 1896:

The mining stock market for the past week knew few changes of note from the conditions existing during the previous same period. Attention was largely given by local investors to the cheaper and speculative stock, which was mainly keeping up the purely investment portion of the list. Last week's statement that the market was better than it had been for some time, was not a surprise to buyers and sellers in full force.

Purchasers of stocks in the investment section were not particularly active. Ajax did some considerable business at about the previous week's quotations. Of the four men who assisted in making Alta what it was, and who are deserving of the credit of opening up and developing the richest camp that Utah has ever known, but one is alive today. This is Colonel Woodman, a respected and honored citizen of this city, who, although well along in years, is still actively engaged in mining enterprises.

After leaving Alta he engaged in mining in Eureka, Tintic, and was largely identified in the opening and development of the Centennial-Eureka mine, which is classed as one of the richest mines in Utah today, and in which he still holds office and owns a large block of stock; besides which, he is prominent in Deep Creek mining and other enterprises calculated to benefit the state.

James Smith died in California along in the '80's, while R. B. Chisholm departed this life on June 20, 1881.

These pioneers were all strong, influential men, whose word was as good as their bond, and they will be long remembered for the active part they took in the development of the mineral development of this state. The portraits that we give herewith of these gentlemen were taken when they were in the prime of life, and when their efforts in the opening of the Emma mine had been crowned with success.

In speaking of the death of Captain Day, a Galena, Illinois, paper says:

James Day, one of the pioneers of Galena, died Friday morning at his beautiful suburban home at Millburg, at the age of 77 years, and thus ended

a remarkable and successful career. Mr. Day succumbed to a paralytic stroke, and the end was not unexpected. He had enjoyed excellent health up to last winter, when he was stricken by paralysis while visiting in California. He came home very much feeble in health, but rallied and regained much of his former vigor, but last week the second stroke came. At 2 o'clock Friday morning he passed away.

Mr. Day came to Galena in 1834, when a lad of 15. He was of Scotch-Irish lineage and a Virginian by birth. His father, Erasmus Day, was one of the first settlers of Vinegar Hill and was a farmer and justice of the peace there until his death. The son spent his earlier life here, engaging in various pursuits, and he saw the development of Galena from an embryo mining camp to, as it was the 50's, the chief commercial mart of the northwest. He followed mining principally, but was at one time engaged in business where the Merchant's National bank now stands. He married Miss Gray, also a member of one of the pioneer families of Galena, who survives to mourn his departure. They had no children.

When the commercial glory of Galena began to wane Mr. Day decided to try his fortunes in the new west, toward which a steady stream of immigration was then pouring. He went to the gold fields of California and lived in the west twenty years. Those were times of adventure of all kinds in the west and he experienced his share.

He became one of the owners of what was called the Emma mine, a rich silver lode, in Utah. The mine developed into a veritable bonanza, and dividends from Mr. Day's sixteenth interest made him a rich man. In a short time he cleared up about a quarter of a million dollars.

Having made his fortune he returned to Galena and bought a pretty home at Millburg, where he spent his last years. Although he made frequent visits to California, he also bought a section of land surrounding his home, which he owned until his death. He was a man of large heart and generous spirit, and his large fortune was reduced much, but he retained an abundance.

Mr. Day had a strong personality, in which were blended the courtesy and refinement of the old school gentleman with the sterner qualities of the pioneer. He had a distinguished appearance and his striking resem-

blance in features and form to General Robert E. Lee was often remarked. By all the older citizens of Galena he was known as pre-eminently an honest man, one without guile. Mr. W. F. Snyder, who knew him from his first year of residence here and they were close friends throughout life.

The funeral of Mr. Day was held Sunday afternoon from his residence at Millburg, and the vast concourse of attending friends, the largest which he held. Many from Galena and all surrounding townships were present, and the cortege that moved from the residence of Greenwood cemetery in this city was over a mile in length.

tain Ryan states that in the lower workings of the mine there are large bodies of dry ore that will pay to mill on the ground; besides which there are good stopes of silver lead ores to draw from.

In the same locality there are other old-time producers, such as the Wild Dutchman, which is now making an excellent showing in the hands of St. Joseph parties.

American Fork canyon is a typical camp as it abounds in plenty of wood, and water for power purposes exists in abundance.

## THE GREAT MERCUR MINE.

George Derr, one of the directors of the Mercur Mining company, who returned to the city Wednesday night, brought with him samples of ore from this magnificent producer which is different in character from any yet found in the mine, being a flinty quartz, impregnated with similar, that from two assays made, shows values of \$29 and \$33 in gold to the ton.

This ore came from the main Ruby incline-shaft on the Mercur ledge, which is now down 300 feet on the vein, the face being in a solid body of good grade milling ore.

The drift above-mentioned was started at a distance of 150 feet below the tunnel level and has been driven thirty feet in a southerly direction into the hill; and the ore encountered and blocked out is a flinty-quartz, as already indicated, and is free milling and it was divided into many metals or deleterious substance.

In the driving of this incline-shaft and the running of drifts at intervals, immense bodies of high-grade ore are being located, and Mr. Derr, of the company, states that in his opinion he would not be surprised to learn that the men had uncovered a body of free gold ore in this part of the mine.

The other workings of the Mercur group are showing up exceedingly well, and the mill is giving very satisfactory returns.

All the mines of Mercur are now looking better than ever, and it would be almost, almost, to compute the value of the immense deposits of ore now developed and blocked out in the great producers of this wonderfully rich camp.

## THE STOCK EXCHANGE.

The Benefits Derived Through This Organization.

Now that the stock exchange has taken a month's vacation during the heated term, it might be well to review the history of the organization, and to see how far the good this institution has done the mining industry since its organization.

In the first place, it would be well to recall the fact that the organization of the exchange there was no official quotation on mining stocks in this city, and therefore the dealings in this line of securities were necessarily made through the medium of the outside market, and it was difficult to determine the actual selling price of nearly all of the stocks on this market.

With the opening of the exchange, however, quotations were established, and whether or not sales were made, the public were enabled to learn the comparative value of the stocks listed, and could govern themselves accordingly.

By the board of directors, who are published in the daily papers and circulated far and wide, have interested outside capital in Utah stocks, much to the advantage of the mining industry.

The advantage of an official market, would soon prove a damper to our mining interests, and without this means of ascertaining the market value of stocks, interest in mining and the purchase of stocks for investment and speculation would very soon decrease very materially.

In the mining camps of Utah there are many who are greatly interested in the exchange; and yesterday some Eureka citizens, who are taking in the carnival, stated that they would, if necessary, make donations in order to keep the board alive.

As soon as the vacation is over it is believed that the reopening of the exchange will be attended with greater liberality and activity than ever, and that by that time mining men and brokers will have learned to more fully appreciate its usefulness.

## Strike in the Dark Horse Mine.

CHICAGO, July 2.—The Times-Herald, Deadwood, S. D., special says that in the Dark Horse mine, in the Bald Mountain district, a two-foot vein of ore has been struck that assays \$2,300 a ton.

Ore and Bullion.

The ore and bullion receipts yesterday were as follows:

Bamberger & McMillan—Ores, \$4,961. Commercial National Bank—Ores, \$2,400. McCormick & Co.—Bullion, \$3,875; ores, \$5,400. T. R. Jones & Co.—Bullion, \$3,700; ores, \$2,000.

## Silver and Lead.

Bar silver was quoted yesterday at 65 1/2 cents; lead, \$3; casting copper, 10 1/2 cents.

## Bank Clearings.

The clearings of the associated banks yesterday were \$14,767. The same day last year was a legal holiday.

## Mining Notes and Personals.

Colonel W. H. Smith of Millford, the well-known mining operator, arrived in the city yesterday.

Anthony Godde of Bullionville, Nev., is in the city. Mr. Godde is an expert miner and an excellent mineralogist.

The Rand drill for the East Golden Gate mine at Mercur is being put in place, and it is expected that it will be in operation by Monday.

The Dalton & Lark yesterday received 14 tons of carbonates, and the rock was reported to be very rich in ore or on route to this city.

William Dix, the well-known Utah miner, is in the city from Cassia county, Idaho, where he has some very promising veins and has been prospecting.

John Kern, president of the Mercur Mining company, will go out to the mine and mill today, and upon his return will depart on his delayed European trip.

Bob James Andrus, of St. George, is in town taking in the carnival. Mr. Andrus believes that with railroad facilities southern Utah would develop wonderful mineral resources.

William Orr, the representative of the McArthur-Forsyth Gold and Silver Reduction company, who is doing some expert work at the Mercur mill, is in the city enjoying the carnival.

Joe Bush, of Bingham, one of the owners of the Park and Sea in the taking in the carnival. Joe says the E. S. is looking well and has all the indications for a big mine that one could wish to see.

John Horton, of De Lamar, Nevada, is in the city. Mr. Horton has just sold a prospect near the De Lamar mines to Captain J. R. De Lamar, and his visit here is for the purpose of closing up the property.

The mining float in yesterday's parade attracted a great deal of attention, and Dr. Faust was wildly cheered as, with his associates, he made homing of gold and silver, and, "We have struck it rich!" The "49" float was

Can't afford  
fifty cents for tea?

Suppose you get more tea, better tea, than what you've been drinking; suppose you get all tea, instead of part poison and part gypsum.

Suppose you get your money back if you don't like it. How can you lose on this proposition?

Schilling's Best (and your money back) at your grocer's.

Other members of the money-back family: Schilling's Best coffee, baking powder, soda, spices, seasoning, flavoring extracts.

A Schilling & Company San Francisco

also well received, as was also "Utah in 1896."

M. Davis of the Annie mine at Mercur informs The Herald that drifts are now being run on an ore body that assays from \$2 to \$5 in gold to the ton, and he is of the opinion that before long this mine will show up fine deposits of good milling ore.

John Campbell and George Hammer returned from Death canyon yesterday, having completed their contract on property owned by the Queen Consolidated Mining company. The incline is now in seventy-five feet on the Queen and has cut a seven-foot vein of paying ore.—Lehl Barner.

Work is being pushed on the Northern Light mine on Lion Hill, Ophir district, and the new working tunnel is already in a distance of forty feet. The company is shipping high-grade silver ore, and when connections are made this bonanza property will develop into a great producer.

J. W. Scott, manager of the Primrose and Johannesburg mines, at Silver Lake, in the city taking in the carnival. The bottom of the 180-foot shaft in the Primrose is in pyrites and the outlook is most promising. The Johannesburg shaft is down 70 feet, with fine indications.

Dr. A. J. Shores, of Los Angeles, California, is in the city visiting his brother. Dr. Shores was accompanied in his visit here by his father-in-law, T. G. Wimmer, who is just in from Vanderbilt, California, with a \$7,000 gold brick from the Barcroft mine and mill. Mr. Wimmer says the mine looking well, and is good for lots of "dough."

If litigation is any sign of a rich mining camp, City Creek canyon has all the necessary earmarks, as it is understood that Jones and Keeler, owners of the two Amies, located on Black Mountain, about nine miles north of this city, and Paris and Jones, who claim title to the Bullion mine, in the same locality, are about to indulge in a lawsuit to settle the conflict of description and location between these two properties.

General Manager H. A. Cohen of the De Lamar mines in Utah and Nevada informs The Herald that the output of the De Lamar mines at Park City for the month of June was \$155,000, and this, too, with the mill running at only about three-fourths of its capacity. This month, however, the mine will run right up to the handle, and it is expected that the output will be larger.

The De Lamar is a wonderful property, and is destined to make a barometer of money for its owners.

For many years it has been the belief that gold would be found in the mountains east of Cedar City, in Iron county, and occasionally rich pieces of float have been seen in this locality, but the ledges were never discovered. Recently, however, ore in place has been found in this section between the summit of Cedar mountain and Three Creeks. The float at the place of discovery assayed \$2.75 in gold to the ton, while it is stated that Frisco parties have struck a very rich there.

S. A. Higbee of Cedar City, who arrived in the city yesterday, brought with him ore from the new find, which will be assayed today.

Among the prominent people now visiting Baker City, with a view of examining into our mining resources with a view of investing is Mr. Peter Hobkirk of Portland, who has had his labors in the line of developing properties at Elkhorn and Greenwood mountains. In the latter district Mr. Hobkirk is already interested in what are known as the Department and Surprise mines, perhaps better known as the Frisco and Clarno properties. David Kiehl of Park City, Utah, is also here looking after an opportunity to invest. Mr. Kiehl is one of the principal shareholders in the Silver King mine at Park City. He is accompanied by Mr. J. X. Ferguson of Salt Lake—Democrat, Baker City, Oregon.

## MINERS' ASSAY OFFICE.

Home Mine Batten.

KANSAS CITY, Mo., July 2.—Score—Kansas City, 3; base hits, 5; errors, 4. Milwaukee, 12; base hits, 12; errors, 2. Batteries—Kling and Lake; Bettger and Spear.

## Profited by Misplays.

CINCINNATI, O., July 2.—The Red's slightly outbatted St. Louis and profited by the misplays of the visitors. Score—Cincinnati, 10; St. Louis, 9; errors, 1. St. Louis, 5; base hits, 10; errors, 4. Batteries—Fisher and Peitz; Hart and McFarland.

## Were Ridiculous.

WASHINGTON, July 2.—Although Washington had the only earned run today errors which were ridiculous in their flagrancy gave the game to Boston. Both pitchers were in excellent form and Demont's work was phenomenal. Attendance, 6,300. Score—Washington, 2; base hits, 3; errors, 4. Boston, 4; base hits, 3; errors, 4. Batteries—McFarland and McGuire; Nichols and Tenney.

## ONE HONEST MAN

Editor: Please inform your readers that it is written to confidentially I will mail a warrant letter plan, whereby which I was permanently released to health and made my story of suffering from Nervous Weakness, and was a complete cure.

I have no scheme to extort money from any one. I was not deceived by quacks until nearly lost faith in mankind, but thank heaven, I am now well, vigorous and strong, and anxious to make this certain news of cure known to all. Having nothing to sell, send C. D. 1, I want no money. Address, JAMES A. BARRIS, Box 24, Delray, Mich.

KANSAS CITY, July 2.—Results: First race, five and one-half furlongs, selling—Adeline won, Black Satan second, Dr. McAllister third. Time—1:17 1/2.

Second race, five furlongs—Wild Mint won, Dr. Crumrine second, Fate third. Time—1:18 1/2.

Third race, seven furlongs, selling—Little Chap won, Wild Tartar second, Zeldia third. Time—1:26 1/2.

Fourth race, four and one-half furlongs, selling—Tom Thompson won, John Boone second, Confessor third. Time—1:39.

Fifth race, one mile, selling—Long Ten won, Sir Charles second, Zenda Vista third. Time—1:50 1/2.

Sixth race, five furlongs, selling—Thurman won, Wanda T. second, John C. third. Time—1:07 1/2.

ST. LOUIS, July 2.—A rain storm put the track in poor condition today, making it very sloppy. Summaries: First race, one mile, selling—Hickok won, Shing Belle second, Ben Waddell third. Time—1:43 1/2.

Second race, six and one-half furlongs—May Thompson won, Brav Vista second, St. Augustine third. Time—1:32 1/2.

Third race, mile, selling—Haroldine won, Rhett Goode second, Hawthorne third. Time—1:44.

Fourth race, five furlongs—Jock B. won, Dars II second, Omaha Wood third. Time—1:03 1/2.

Fifth race, mile and twenty yards, selling—Jack Bradley won, Favorite second, Tradition third. Time—1:47.

Sixth race, six furlongs—Neutral won, Dorah Wood second, Johnny McHale third. Time—1:19 1/2.

NEW YORK, July 2.—Summaries: First race, five furlongs, selling—Successful won, Nanah second, Nina Louise third. Time—1:02.

Second race, one mile—Forget won, Tinge second, Decayer third. Time—1:42 1/2.

Third race, futurity course—Scottish Chieftain won, Redmond second, Casapita third. Time—1:12 1/2.

Fourth race, the sprinter in stakes, mile and a furlong—Formal won, Gold Crest second, Cassello third. Time—1:26.

Fifth race, six furlongs, selling—Paladin won, Zanco second, Agitar third. Time—1:14.

Sixth race, mile and three furlongs on turf—Counsellor Howe won, Merry Prince second, Long Beach third. Time—2:23 1/2.

SHEFFIELD, Ind., July 2.—Results: First race, six furlongs—Unias won, Terra Archer second, George B. Swift third. Time—1:15.

Second race, five furlongs—Zamar II won, Woodland Belle second, Yours Truly third. Time—1:13 1/2.

Third race, mile—Serena won, Fred K. second, Mille M. third. Time—1:42 1/2.

Fourth race, seven furlongs—Zimmon won, The Kitten second, Ida Pickwick third. Time—1:37 1/2.

Fifth race, six furlongs—Miss Young won, Glenoid second, Gomer third. Time—1:14.

Sixth race, six furlongs—Candfield won, Roy Lochel second, Joe Mancini third. Time—1
